

Stock Investment Update

We are resuming some of our improvement programmes and services, starting with incomplete external/internal work (which was paused during lockdown) – this includes; external decoration, roofing, external wall upgrades, boiler replacements, plus completing some kitchens and bathrooms. In addition, some surveys will restart to enable us to move forward with our overall investment programmes. We are also beginning our new windows and external doors programme and full internal kitchen and bathroom replacements are now starting to take place again.

We are contacting customers due for improvement work to explain what happens next and how the works can be carried out safely.

We'll be reviewing these services regularly and updating you as things change, so do check facebook and twitter @impachousing and on our website at www.impacthousing.org.uk for more information.

Some examples of the improvements
